

SHARE FOR SALE

Tango Zulu is a two seat Slingsby Firefly T67M with a 160 hp fuel-injected Lycoming AEIO320 engine and three-blade constant-speed propeller. The fuel-injected engine with inverted fuel and oil systems allows the aircraft to perform aerobatics. A new 3 blade MT-propeller was installed in 2020 improving performance.

We have installed Sky echo with headset audio via a new Trig radio allowing integration with Sky Demon. We have also recently installed additional wing-tip strobe lights. In 2024 the mainplane was fully stripped and resprayed.

The group has been established for over three decades and is located at Leeds East Airport. G-SFTZ was bought in 2013 to replace our previous Firefly, G-BIOW.

We have an on line booking system and great availability. This [website](#) provides a wealth of information to the members.

- Share purchase price £5,200
- Monthly fee £110 payable by direct debit
- Flying cost per hour £110 (Fuel and oil included)
